Product Overview

Industrial Pneumatic Airbag Clamps

These industrial airbag clamps are engineered for secure and reliable clamping applications across demanding environments, including machinery and automotive sectors. Constructed with robust metal end plates and durable rubber bellows, they provide excellent flexibility and cushioning while ensuring long-lasting performance. Designed for versatility, these units are suitable for applications requiring vibration dampening and pneumatic clamping solutions.

Technical Specifications

Weight	1.24 kg
Dimensions	150 mm x 86 mm
Materials	Steel, Rubber

Compatibility & Usage

Compatible Systems

- LM2 Systems
- LM5 Systems

Manufacturing & Customization

Manufacturing Capability

Custom drawings accepted • Sample-based production
