Product Overview

Professional Pneumatic Metal Connector Nailer

This pneumatic metal connector nailer is engineered for high-performance fastening in demanding construction environments. Designed for efficiency and precision, it excels in tasks ranging from interior finish and trim to heavy-duty truss building. With durable construction and ergonomic handling, this tool ensures consistent nail placement and reliable operation across various metal connecting applications.

Applications

Primary Applications

Interior finish, Trim work, Exterior finish, Furniture assembly, Cabinet work

Technical Specifications

Model Comparison

Feature	XR250S	XR250
Weight	2.58 kg	2.77 kg
Magazine Capacity	35 pcs	55 pcs
Dimensions (mm)	330x104x346	445x104x346

Operating Pressure

70 psi

Min Pressure

115 psi

Max Pressure

Fastener Details

Nail Angle	34 degrees
Fastener Length	32 - 64mm
Head Diameter	7.4 mm
Fastener Diameter Range	3.3 - 4.1mm
