

Pneumatic Narrow Crown Stapler

This pneumatic tool drives narrow crown staples into various materials. It features adjustable depth control for precise staple placement and a quick-release magazine for fast reloading.

Product Overview

Professional Performance

This pneumatic narrow crown stapler is engineered for precision and reliability in demanding industrial environments. Featuring a lightweight design for enhanced maneuverability, it incorporates adjustable depth control to ensure accurate staple placement every time. Built with a durable aluminum housing and a hardened steel driver blade, this tool is designed to withstand rigorous daily use.

Technical Specifications

Operating Pressure

70 PSI

Min Pressure

100 PSI

Max Pressure

Construction Materials

Aluminum Housing, Hardened Steel Driver Blade

Features

Key Features

- Adjustable depth control
- Quick-release magazine for fast reloading
- Lightweight ergonomic design

Application

Industrial • Pneumatic
