

Pneumatic Orbital Sander for Surface Smoothing

This pneumatic orbital sander is designed for efficient material removal and surface preparation. It utilizes compressed air for operation and is suited for smoothing surfaces in automotive and woodworking applications.

Overview

High-Efficiency Surface Smoothing

This pneumatic orbital sander is engineered for professional surface preparation in automotive and woodworking environments. Utilizing compressed air for consistent power, it ensures efficient material removal and a smooth finish. The tool is designed with versatility in mind, offering multiple pad attachment options to suit various abrasive disc requirements.

Technical Specifications

Compatible Pad Types

- Velcro type
- Vinyl type

Sanding Pad Diameter	6 inch
Power Source	Compressed Air (Pneumatic)

Application

Primary Applications	Automotive, Woodworking, Surface Smoothing, Material Removal
