

Pneumatic Paving Breaker with D-Handle

The pneumatic paving breaker is equipped with a D-handle for enhanced control and comfort during operation. It is designed for demolition and construction applications, offering reliable performance in demanding environments.

Overview

Professional Demolition Performance

The Pneumatic Paving Breaker with D-Handle is a robust, air-powered tool engineered for demanding construction and demolition environments. Designed for efficiency, it delivers high impact frequency and energy to effectively break through concrete, asphalt, and other hard materials. Its ergonomic D-handle configuration enhances operator control and comfort, significantly reducing fatigue during extended use.

Technical Specifications

Power Source	Compressed Air
Handle Design	D-Handle

Features

Key Features	Vibration-dampening, Ergonomic Design, High Impact Energy, Durable Construction
--------------	---

Applications

Suitable Applications

- Road repair
- Building demolition
- General construction
- Concrete breaking
- Asphalt removal
