

Pneumatic Rock Drill for Mining and Construction

This pneumatic rock drill is designed for drilling in mining and construction applications. It utilizes an air-powered percussion mechanism for efficient rock breaking and features an ergonomic handle for comfortable operation and robust construction for durability.

Overview

High-Performance Pneumatic Rock Drill

This pneumatic rock drill is engineered specifically for demanding mining and construction environments. Utilizing an advanced air-powered percussion mechanism, it delivers efficient rock breaking capabilities for consistent performance. Designed with an ergonomic handle and robust, durable construction, it ensures reliability and operator comfort when drilling into rock, concrete, and other hard materials.

Technical Specifications

Power Source	Pneumatic (Air-powered)
Suitable Applications	Mining, Construction, Rock Drilling, Concrete Breaking

Design & Features

Construction Quality	Heavy Duty • Wear Resistant
Ergonomic Features	Yes
