

Pneumatic Rock Drill for Mining

This pneumatic rock drill is designed for heavy-duty drilling and breaking applications. It is suited for large-scale material processing and extraction operations in demanding mining environments.

ADDITIONAL IMAGES

Product Overview

Robust Pneumatic Mining Equipment

This pneumatic rock drill is engineered for heavy-duty drilling and breaking applications in demanding mining and construction environments. Designed specifically for large-scale operations, it is suitable for mineral extraction and breaking up rock materials. The equipment is built to withstand the rigors of opencast mining sites.

Application & Usage

Intended Applications

Opencast Mining, Mineral Extraction, Rock Breaking, Construction Drilling

Logistics

Packaging Information

- Secure wooden crate packaging
- Designed for heavy-duty transport
