

Pneumatic Rotating Vacuum Brush Attachment

This pneumatic brush attachment is designed for use with vacuum cleaners. The rotating brush head is powered by airflow, enhancing cleaning on various surfaces.

Product Overview

High-Performance Cleaning Attachment

This pneumatic rotating vacuum brush attachment is engineered to enhance the cleaning efficiency of standard vacuum cleaners. Powered directly by the vacuum's airflow, the rotating brush head effectively agitates and lifts dirt and debris from various surfaces. Its durable, compact design ensures longevity and allows for easy maneuvering in tight spaces and under furniture.

Technical Specifications

Power Source	Vacuum Airflow
Material	Durable Plastic
Compatibility	Universal Vacuum Models

Key Features

Main Features

- Airflow-powered rotating brush head
- Compact design for tight spaces
- Easy connection and removal mechanism
- Effective dirt and debris agitation
