

Pneumatic Scaling Hammer for Rust Removal

Pneumatic scaling hammer designed for removing rust, scale, and other debris from metal surfaces. Features a durable construction and ergonomic handle for comfortable operation.

Product Overview

Industrial Surface Preparation

This pneumatic scaling hammer is specifically engineered for heavy-duty rust and scale removal from metal surfaces. Built with robust construction to withstand industrial environments, it provides reliable performance for construction and maintenance applications. The ergonomic handle design ensures operator comfort during extended use, making it an essential tool for efficient surface preparation.

Technical Details

Key Features

- Ergonomic handle design
- Durable heavy-duty construction
- Optimized for metal surface cleaning

Primary Application	Rust Removal, Scale Removal, Surface Preparation, Industrial Maintenance
Power Source	Pneumatic (Compressed Air)
