

Pneumatic Split Strapping Tool Set

This set includes a tensioner, weighing approximately 4.3kg, and a sealer, weighing approximately 3.2kg. It is designed for steel strapping, providing tension up to 10KN for 19mm straps and up to 13KN for 32mm straps.

Product Overview

Professional Split Strapping System

This pneumatic split strapping tool set is designed for heavy-duty industrial applications, separating the tensioning and sealing functions for maximum efficiency and security. By isolating these tasks, operators can achieve optimal strap tension and reliable seals on bundles, pallets, and large, irregularly shaped items. Its durable construction and ergonomic design ensure long-lasting performance and operator comfort in demanding packaging environments.

Technical Specifications

Compatibility and Dimensions

Feature	High Tensile Tensioner	High Tensile Sealer
Strap Widths	16mm, 19mm, 25mm, 32mm	16mm, 19mm, 25mm, 32mm
Strap Thickness	0.9mm	0.9mm
Compatible Seal Sizes	N/A	16mm, 19mm, 25mm, 32mm

Supported Strap Widths	16mm, 19mm, 25mm, 32mm
-------------------------------	------------------------

Maximum Strap Thickness	0.9 mm
