

Pneumatic Spray Gun for Coating Applications

This high-performance pneumatic spray gun is engineered for a variety of coating applications. It features adjustable controls for precise regulation of fluid and air pressure, ensuring an optimal finish.

Product Overview

High-Performance Coating Solution

This pneumatic spray gun is engineered for versatility and precision across various coating applications, including automotive refinishing, woodworking, and general industrial painting. It utilizes a gravity-feed system to ensure efficient material usage and consistent spray patterns for a professional finish. Built with durable materials, this tool is designed to provide long-lasting reliability in demanding work environments.

Technical Specifications

Feed Type	Gravity-feed
Adjustable Controls	Fluid Flow Regulation, Air Pressure Regulation

Applications

Suitable Applications

- Automotive Refinishing
- Woodworking
- General Painting Projects

Performance

Key Performance Metrics
