

Pneumatic Stapler for Fastening Applications

This pneumatic stapler is designed for various fastening applications. It uses compressed air to drive staples into materials, offering efficient and reliable performance.

Overview

Professional Pneumatic Stapler

This pneumatic stapler is engineered for reliable performance in a wide range of fastening applications. Designed with a durable construction and an ergonomic handle, it ensures user comfort during extended use. The tool features adjustable settings for precise staple depth control, making it an ideal choice for both professional construction projects and demanding DIY tasks.

Technical Specifications

Staple Gauge	Ga21
Crown Width	12.8 mm
Leg Length	6mm - 16mm
Wire Dimensions	0.9 x 0.7 mm
Air Inlet Size	1/4"

Compatibility

Compatible Series

8016

Key Features

Key Features	Ergonomic Handle, Adjustable Depth Control, Durable Construction, Pneumatic Operation
