

Pneumatic Surface Sander

This pneumatic sander is designed for surface preparation and finishing. It utilizes compressed air to power its orbital or rotary sanding action, providing efficient material removal and a smooth surface.

Overview

Professional Surface Preparation

This pneumatic surface sander is engineered for high-efficiency material removal and finishing tasks. Utilizing compressed air to power its orbital or rotary sanding action, it delivers consistent, smooth results across a variety of substrates including wood, metal, and plastic. Designed with the user in mind, it features adjustable speed controls and an ergonomic grip, making it a reliable tool for demanding applications in automotive, woodworking, and construction environments.

Technical Specifications

Power Source	Compressed Air
Compatible Materials	Wood, Metal, Plastic

Features

Key Features

- Adjustable speed control
- Ergonomic design
- Integrated dust extraction

Applications

Ideal Applications

Automotive • Woodworking • Construction
