

Pneumatic Surface Scraper

This pneumatic scraper is designed for removing materials from surfaces. Its hardened steel blade ensures durability and efficient scraping.

Product Overview

Professional Grade Surface Preparation

The Pneumatic Surface Scraper is a professional-grade tool engineered for heavy-duty material removal tasks. Featuring a hardened steel blade, it offers exceptional durability and efficiency when clearing rust, tile, mortar, and other stubborn debris from surfaces. Designed for compatibility with standard pneumatic hammers and chipping guns, this scraper provides a wide working surface to significantly increase site productivity.

Technical Specifications

Blade Material	Hardened Steel
Tool Compatibility	Pneumatic Hammers, Chipping Guns
