

Pneumatic Tire Changer for Automotive Service

This tire changer is designed for efficient and safe tire mounting and demounting. It features a robust construction for durability and long-term use in automotive service environments.

Product Overview

Professional Performance

This pneumatic tire changer is engineered for the demanding environment of automotive service centers. Featuring a robust design, it ensures safe and efficient tire mounting and demounting operations. With a pneumatic bead breaker and a precise swing arm, this unit delivers consistent, reliable performance for a wide range of professional wheel maintenance tasks.

Key Features

Integrated Systems

- Pneumatic bead breaker
- Turntable with clamping jaws
- Precision swing arm
- Robust steel construction

Operational Capabilities

Compatibility

Automotive Service, Tire Mounting, Tire Demounting
