

Pneumatic Tool Component

This component is designed for use in pneumatic tools. It facilitates the operation and enhances the performance of pneumatic systems.

Overview

Compact Portable Audio Solution

This compact and lightweight portable PA amplifier is designed for versatility in various environments. Featuring a built-in speaker, it supports microphone and auxiliary inputs, making it an ideal choice for announcements, presentations, and small gatherings. The unit is engineered for mobility, offering optional wireless microphone capabilities and a rechargeable battery for on-the-go use.

Technical Specifications

Audio Inputs

- Microphone Input
- Auxiliary Input

Control Features

Volume Control, Wireless Microphone Capability

Design & Power

Portability

Compact • Lightweight • Rechargeable Battery

Primary Applications

- Public Announcements
- Presentations
- Small Gatherings
