

Pneumatic Tool Dust Collection Kit

This pneumatic tool dust collection kit is designed for various applications. It features a flexible hose connected to a collection bag for efficient dust and debris removal, along with an airflow valve and tapered nozzle.

Product Overview

Professional Dust Management

This pneumatic tool dust collection kit is a versatile accessory designed to maintain a clean and safe working environment. It features a flexible hose, a high-capacity collection bag, and a precision control valve, making it an essential addition to any pneumatic tool setup. Ideal for woodworking and metalworking applications, this kit ensures efficient debris removal for improved operational accuracy.

Design & Components

Hose Color	Blue
Collection Bag Color	White
Valve Color	Black

Usage & Applications

Key Features

- Flexible hose for maneuverability
- Integrated collection bag
- Airflow control valve
- Tapered nozzle for precision

Compatible Industries	Woodworking, Metalworking, Industrial Manufacturing
