

Pneumatic Tool Remote Control

Remote control designed for pneumatic tools and accessories. It allows users to adjust settings and initiate operations on compatible pneumatic tools.

Product Overview

Industrial Control Solution

This pneumatic tool remote control is engineered for precise management of compatible pneumatic equipment in industrial and automotive environments. Featuring an ergonomic design for comfortable handling, it includes intuitive controls for power, volume, and navigation. This device streamlines operations by allowing users to adjust settings and initiate specific functions remotely, enhancing efficiency and workflow control on the shop floor.

Technical Specifications

Control Functions

- Power Control
- Volume Adjustment
- Navigation Controls

Design Features

Ergonomic Design • Intuitive Layout

Application Areas

Industrial, Automotive
