

Pneumatic Vacuum Cleaner Brush Attachment

This pneumatic brush attachment connects to vacuum cleaners for efficient cleaning. It features a durable metal base with embedded brush strips and a protective rubber bumper.

Product Overview

Professional Pneumatic Brush Attachment

This pneumatic vacuum cleaner brush attachment is engineered for efficient dust and debris collection across various floor surfaces. Featuring a durable metallic base plate and integrated red brush strips, it is designed to agitate and remove stubborn particles effectively. The inclusion of a protective black rubber bumper ensures surface safety during operation, making it a reliable tool for professional cleaning environments.

Design & Construction

Brush Elements

- Integrated red brush strips
- Metallic base plate
- Standard nozzle connection

Base Plate Material	Polished metal
Protection Features	Rubber bumper, Surface protection

Compatibility & Specs

Nozzle Type	Standard size
Head Shape	Rectangular
