

Pneumatic Wheel Assembly for Industrial Machinery

This pneumatic wheel assembly is designed for use in machinery and industrial applications. The wheel features a robust rubber tire with a tread pattern, metallic hub, and precision bearings.

Product Overview

Industrial-Grade Mobility

This pneumatic wheel assembly is engineered for demanding industrial machinery, providing high durability and reliable performance. The design features a robust rubber tire with an optimized tread pattern for superior grip and stability in workplace environments. Equipped with a metallic hub and precision bearings, the assembly ensures smooth rotation and consistent service life for diverse industrial and textile machinery applications.

Technical Specifications

Key Features

- Optimized tread pattern for grip
- High-stability pneumatic tire
- Integrated precision bearings
- Durable metallic hub construction

Component Type	Pneumatic Wheel Assembly
----------------	--------------------------

Materials	Rubber, Metal
-----------	---------------

Application

Suitable Industries

Industrial Machinery • Textile Machinery • Apparel Manufacturing
