

Pneumatic Wheel Barrow with Steel Frame

This barrow is designed for transporting materials in construction and gardening. It features a durable steel frame, a high-capacity tray, and a pneumatic tire for smooth maneuverability.

Product Overview

Robust Material Handling Solution

This pneumatic wheel barrow is engineered for versatility and durability in demanding environments like construction, landscaping, and gardening. It features a heavy-duty steel frame paired with a high-capacity tray, ensuring it can handle substantial loads of soil, gravel, or concrete. The pneumatic tire design facilitates smooth maneuverability even over rough or uneven terrain, while ergonomic handles are integrated to reduce operator strain during extended use.

Key Features

Key Features

- Durable steel frame construction
- High-capacity material tray
- Pneumatic tire for rough terrain
- Ergonomic handle design

Application Areas

Suitable For

Construction, Gardening, Landscaping

Performance

Typical Loads

Soil • Gravel • Concrete • Heavy Materials
