

Pneumatic Wheelbarrow Wheel with Rubber Tire

This pneumatic wheelbarrow wheel is designed for smooth rolling and reliable performance. Featuring a durable rubber tire and a robust metal hub, it provides excellent load-bearing capacity and shock absorption.

Product Overview

Industrial-Grade Mobility

This pneumatic wheelbarrow wheel is engineered for superior performance in demanding environments, offering smooth rolling capabilities and high load-bearing strength. Its robust metal hub and durable rubber tire provide excellent shock absorption, making it an ideal replacement or upgrade for wheelbarrows and industrial carts. The adjustable pneumatic design ensures optimal handling across diverse terrains, effectively reducing operator fatigue and improving workspace efficiency.

Technical Specifications

Typical Applications

- Wheelbarrows
- Industrial carts
- Utility trolleys

Tire Type	Pneumatic
Construction Materials	Rubber, Metal

Key Features

Operational Benefits

1 High

Shock Absorption

1 High

Terrain Versatility

Core Advantages

Adjustable Pressure • Durable Build • High Maneuverability
