

# Pneumatic Wheelbarrow with Steel Frame

This wheelbarrow is built with a durable steel frame and high-capacity metal tray for exceptional strength. Its ergonomic handles and single pneumatic tire provide a comfortable grip and smooth rolling over uneven terrain.

## Product Overview

### Robust Material Handling

This pneumatic wheelbarrow is engineered for demanding material handling tasks across construction sites, farms, and gardens. Featuring a durable steel frame and a high-capacity metal tray, it offers exceptional strength and longevity for heavy-duty use. The ergonomic handle design ensures operator comfort and maneuverability, while the single pneumatic tire provides smooth transport over uneven terrain.

## Technical Specifications

Frame Material	Steel
Wheel Type	Pneumatic

## Key Features

### Typical Loads

- Soil
- Gravel
- Concrete
- General Heavy Loads

Suitable Applications	Construction Sites, Gardening, Farming, Material Handling
Ergonomic Design	Yes
