

Pneumatic Wheelbarrow with Steel Tray

This wheelbarrow is designed for landscaping and construction tasks. It features a durable metal tray and a single pneumatic tire for easy maneuverability.

Overview

Robust Utility Wheelbarrow

This pneumatic wheelbarrow is engineered for demanding landscaping and construction environments. Featuring a durable steel tray and a sturdy tubular frame, it provides reliable support for transporting heavy materials like soil, gravel, and debris. Its single pneumatic tire design ensures smooth maneuverability across uneven terrains, while the ergonomically designed handles offer superior control and comfort for professional operators.

Technical Specifications

Tray Material	Steel
Wheel Type	Pneumatic
Frame Construction	Tubular Steel

Key Features

Usability Features

- Ergonomic handle design
- High-terrain maneuverability
- Durable heavy-duty tray

Application Areas	Landscaping, Construction, DIY Projects, Material Handling
