

Point of Sale Terminal with Cash Dispenser

This point-of-sale terminal integrates cash register functions. The unit features a metal enclosure, card reader, cash dispenser, receipt printer bay and ventilation grills.

Product Overview

Robust Retail POS Solution

This standalone Point of Sale terminal and cash register is designed for seamless integration into professional retail environments. Featuring a durable metal enclosure, it provides a secure and reliable housing for essential transaction components, including a screen, card reader, and receipt printer. Its built-in cash dispenser and thermal management system make it a comprehensive hardware solution for high-traffic commercial settings.
