

Point of Sale Terminal with Cash Register

This point of sale terminal integrates cash register functions. It is designed to streamline transaction processing and sales management for businesses.

Overview

Heavy-Duty Recovery Winch

This electric winch is engineered for reliable vehicle recovery and demanding pulling tasks. Built with a robust motor and high-strength steel cable, it provides the consistent force required for off-road and professional recovery operations. The included remote control ensures operator safety, while the comprehensive kit—featuring a snatch block and mounting hardware—allows for straightforward installation and immediate use.
