

Pole-Mounted Fruit Harvesting Machine

This is a pole-mounted fruit harvesting machine designed for efficient and safe collection. It features a long, extendable pole and a specialized harvesting head for gently detaching fruits.

Product Overview

Professional Fruit Harvesting Solution

This pole-mounted harvesting machine is engineered for efficient and safe fruit collection in commercial orchards. Featuring an extendable pole and a specialized harvesting head, it allows operators to reach high branches with precision. The gasoline-powered system provides consistent force, while the lightweight, ergonomic design minimizes operator fatigue during long shifts.

Technical Specifications

Power Source	Gasoline Engine
Design Highlights	Extendable Pole, Ergonomic Design, Lightweight Construction
Mechanism Type	Hook/Claw Detachment

Applications

Recommended Use

- Commercial Orchards
- Agricultural Harvesting
- High-Branch Fruit Collection
