Product Overview

Professional Grade Polypropylene Baler Twine

This high-performance polypropylene baler twine is engineered for versatility and durability in agricultural, industrial, and daily applications. Featuring a high-strength twisted construction, this twine is moisture-resistant, rot-proof, and designed to withstand heavy tension. It offers a soft yet durable texture, making it an ideal solution for secure baling, bundling, and professional packing tasks.

Technical Specifications

Weight per Meter

0.5 g/m

Min weight

3 g/m

Max weight

Material 100% Polypropylene (PP)

Structure 1-ply, 3-ply, Twisted

Logistics & Supply

Available Roll Sizes

- 80g per roll
- 5kg per roll

Minimum Order Quantity 5000

Delivery Date 25-30 days

Applications & Features

Product Benefits

High Strength • Moisture Resistant • Durable • Soft Texture

Common Applications

- Agricultural Baling
- Industrial Packaging
- Handicrafts
- Gardening
- Gift Box Filling
