Product Overview

Premium PP Monofilament Twisted Rope

This 3-strand twisted monofilament rope is engineered for durability, offering excellent corrosion and aging resistance. Designed with high-strength polypropylene, it is a practical solution that features zero water absorption, ensuring it floats on water. Ideal for demanding marine, industrial, and agricultural applications requiring a reliable, weather-resistant cordage solution.

Technical Specifications

Material Characteristics	Corrosion Resistant, Aging Resistant, Non-Absorbent, Floats on Water, Acid Resistant
Construction	3-strand twisted

Logistics and Packaging

Available Packaging

- Hank
- Bundle
- Reel
- Coils
- Bags
