Product Overview

Versatile Polypropylene Monofilament Rope

This high-strength, 3-strand twisted rope is expertly engineered for professional truck tie-down applications and general-purpose utility. Constructed from durable polypropylene monofilament, it offers exceptional resistance to corrosion, aging, and moisture, ensuring long-term reliability in harsh environments. Its lightweight yet robust design provides an economical and practical solution for securing loads safely and efficiently.

Technical Specifications

Construction	3-strand twisted rope
Material	Polypropylene (PP) Monofilament
Key Properties	Corrosion Resistant, Aging Resistant, No Water Absorption, High Strength, UV Resistant, Rot Resistant, Mildew Resistant

Standard Dimensions

Dimensions

Diameter	Length
3/8 inch	50 feet
