

# Polysilicon Solar Cell 250W-265W

Polysilicon solar cells are designed for renewable energy applications. They are available in power outputs ranging from 250W to 265W.

## Product Overview

### High-Efficiency Polysilicon Solar Solution

This high-efficiency polysilicon solar panel is engineered for diverse renewable energy applications, ranging from residential setups to large-scale industrial projects. It delivers reliable power outputs between 250W and 265W, ensuring consistent energy generation. With a robust construction designed for long-term durability, this panel is an ideal choice for professionals seeking dependable performance in solar power systems.

## Performance Metrics

### Power Output Range

**250 W**

Minimum Power

**265 W**

Maximum Power

## Technical Specifications

### Key Features

- Robust construction
- Long-term reliability
- High-efficiency design

### Cell Technology

Polysilicon

## Applications

### Suitable For

Residential, Commercial, Industrial
