Product Overview

High-Performance Polyurethane Coil Hose

This professional-grade polyurethane air coil hose is engineered for versatility and longevity in pneumatic applications. Its flexible, coil-based design effectively prevents kinking while ensuring consistent, reliable airflow across various industrial and workshop environments. Constructed from high-quality PU materials, the hose provides excellent resistance to abrasion, chemicals, and environmental weathering.

Technical Specifications

Operating Pressure Range

1.5 KG/CM
Min Pressure

7.5 KG/CM
Max Pressure

Material Composition	Polyurethane (PU98/95)
Safety Factor	3:1
Tube Specification	1208 (12mm OD / 8mm ID)
Hose Length	15 M

Features

Key Attributes	Anti-kinking, Abrasion Resistant, Chemical Resistant, Weather Resistant
