

Pond Bio Filter with UV Sterilizer

This pond bio filter is a robust filtration system for maintaining clean and healthy pond water. It features multi-stage filtration, including mechanical and biological filtration, and incorporates a UV sterilizer.

Product Overview

Professional Pond Filtration System

This robust pond bio filter features an integrated UV sterilizer designed to maintain pristine water quality through multi-stage mechanical and biological filtration. Constructed from durable, weather-resistant materials, it is engineered for reliable outdoor performance and easy maintenance. The system effectively promotes a healthy aquatic environment by eliminating algae and harmful bacteria, making it an ideal solution for both decorative and fish-stocked ponds.

Performance Metrics

Maximum Flow-Through

12000 L/h

Max Flow Rate

Capacity (Fish Ponds)	25 m ³
Capacity (Decorative Ponds)	50 m ³

Technical Specifications

Dimensions (L x W x H)	950 x 540 x 460 mm
Inlet Hose Adapter	3/4" - 3/2"
Outlet Diameter	70/63 mm
