Product Overview

Portable Efficiency for Water Transfer

This 1-inch gasoline water pump is a compact and durable solution designed for efficient water transfer across various applications including agriculture, landscaping, and industrial use. Powered by a reliable 4-stroke OHV gasoline engine, it offers high-precision machining and a high-effective mechanical seal for low maintenance. Its lightweight design ensures easy portability, while the stable operation makes it a dependable choice for demanding environments.

Technical Specifications

Discharge Port Diameter	25 mm
Engine Displacement	33.5 cc
Self-Priming Time	50 s/4m
Maximum Head	26 m
Engine Type	4-stroke OHV gasoline engine

Key Features

Design Advantages

- Compact structure
- High precision machining
- Low maintenance mechanical seal
- Easy to start
- Lightweight and portable

Suitable Applications	Landscaping, Agriculture, Industry, Construction, Emergency Water Removal
