

Portable 12L Air Compressor

This portable air compressor is equipped with a 12-liter tank for storing compressed air. It is designed for a variety of inflation and pneumatic tasks, with a pressure gauge for monitoring air pressure and alligator clips for connecting to a 12V power source.

Product Overview

Portable 12L Air Compressor

This portable air compressor is engineered for efficiency and ease of use, featuring a lightweight aluminum tank that weighs only 10.50kg—significantly lighter than traditional iron alternatives. With a generous 12L storage capacity and a maximum airflow of 160LPM, it provides a reliable solution for various pneumatic tasks. The unit includes essential safety features like a safe valve, one-way valve, and an electronic pressure switch for dependable operation.

Technical Specifications

Maximum Air Flow

160 LPM

Max Air Flow

Tank Capacity	12 L
Weight	10.5 kg

Construction & Safety

Tank Material	Aluminum
Safety Features	Safe Valve, One-way Valve, Electronic Pressure Switch
