

Portable 130L Cement Mixer

This cement mixer has a 130-liter drum capacity, suitable for mixing concrete, mortar, and plaster. It features a durable steel frame, pneumatic tires, and an electric motor for efficient mixing.

Overview

Professional Portable Mixing Solution

This all-steel cement mixer is engineered for both construction and farm applications, providing a reliable solution for mixing concrete, mortar, stucco, and drywall mud. With a 130-liter drum capacity and a robust 1/2HP ball-bearing motor, it delivers consistent performance for small to medium-sized projects. The unit is designed for easy assembly and features large 10-inch wheels, ensuring excellent maneuverability across various job site terrains.

Technical Specifications

Drum Capacity

130 L

Capacity

4.59 cu ft

Volume

Motor Power	0.5 HP
Drum Rotation Speed	14 - 26 RPM
Input Voltage	120V, 230V
Operating Frequency	50Hz, 60Hz

Design & Build

Suitable Applications

- Concrete
- Mortar
- Stucco
- Drywall mud

Key Features

Easy assembly • Portable • Maneuverable

Material	All-steel construction
Wheel Size	10 inches
