

Portable 220V Gasoline Generator with Circuit Protection

Portable gasoline generator designed for AC 220V power supply. Features include a circuit protector, AC and DC outputs, and an engine switch.

Product Overview

Portable Power Solution

This portable gasoline generator is engineered to provide reliable AC 220V power for various applications. Designed for versatility, it includes both AC and DC output capabilities to support a wide range of devices. With built-in circuit protection, it ensures safe and stable operation, making it an ideal choice for backup power needs or electricity supply in remote locations.

Technical Specifications

AC Output Voltage	220 V
Available Outputs	AC Output, DC Output

Safety & Control

Safety Features

- Integrated Circuit Protector
- Engine Switch (ON/OFF)
