

Portable 280-Degree Emergency Light

This portable emergency light provides 280 degrees of illumination. Its compact design and integrated handle ensure easy storage and deployment during power outages and other emergencies.

Product Overview

High-Efficiency Emergency Lighting

The TK-829 is a portable, high-performance emergency lighting solution designed for professional environments during unexpected power outages. It features a broad 280-degree illumination angle to ensure maximum coverage in critical situations. Housed in a durable, ergonomic black plastic casing, this unit includes an integrated handle for rapid deployment and easy transport.
