

Portable Abrasive Blasting System with Vacuum Recovery

This portable blasting system is designed for surface preparation and cleaning. It utilizes a vacuum system to recover abrasive media and dust, ensuring a clean working environment.

Overview

Professional Surface Preparation

This portable abrasive blasting system is engineered for efficient surface preparation and cleaning across a variety of substrates including metal, concrete, and plastic. It integrates a powerful vacuum recovery system that captures abrasive media and dust, ensuring a cleaner workspace and reduced environmental impact. Designed for versatility, the unit is lightweight and compact, making it an ideal solution for confined spaces and remote job sites.

Performance & Features

Key Benefits

- Integrated vacuum recovery for media and dust
- Ergonomic and lightweight design
- Quick-connect fittings for rapid setup
- Suitable for confined spaces

Blast Control	Adjustable blast pressure for precise process control
Compatible Materials	Metal, Concrete, Plastic
