

Portable AC Arc Welder

This AC arc welder is compact and designed for portability. It features adjustable current settings for optimal welding performance and durable construction for reliable use.

Product Overview

Portable AC Arc Welding Solution

This portable AC arc welder is engineered for versatility and ease of transport, making it an ideal choice for various welding applications. With its robust construction, it ensures reliable performance in demanding work environments. The unit features adjustable current settings, allowing operators to achieve optimal welding results across different material thicknesses.

Technical Specifications

Performance Overview

| Model | Input Capacity (kVA) | Welding Current (A) | Weight (kg) |
|----------|----------------------|---------------------|-------------|
| BX1-130C | 6.4 | 50-130 | 19 |
| BX1-160C | 8.5 | 50-160 | 20 |
| BX1-180C | 9.3 | 50-180 | 21 |
| BX1-200C | 11 | 50-200 | 22 |
| BX1-250C | 14.3 | 50-250 | 24 |

| | |
|-------------------------|--------------------------------------------------|
| Available Models | BX1-130C, BX1-160C, BX1-180C, BX1-200C, BX1-250C |
|-------------------------|--------------------------------------------------|

| | |
|---------------------------------|------|
| Rated Load Duration Rate | 10 % |
