

# Portable AC/DC Gasoline Generator

This portable gasoline generator is designed for AC and DC power supply. It features a 220V AC output, circuit protection, and an engine switch.

## Overview

### Portable Power Solution

This portable gasoline generator is engineered to provide reliable AC and DC power in remote locations or during grid outages. Designed with versatility in mind, the unit features a standard 220V AC output and integrated circuit protection to ensure safe operation. It serves as an ideal power source for both backup applications and off-grid environments.

## Technical Specifications

AC Output Voltage	220 V
Power Compatibility	AC, DC

## Features

### Safety Features

- Circuit Protector
- Engine Switch

### Design

Portable • Gasoline Powered
