

Portable Air Compressor for Power Tools

This portable air compressor is designed for various inflation and power tool applications. It features a durable tank, pressure gauge, and safety valve.

Product Overview

Professional Performance

This portable air compressor is engineered for demanding workshop environments, delivering robust performance for various power tool applications. Featuring an 1800W motor and a 50L tank, it provides consistent air supply with efficient belt-driven operation. Built-in safety features like thermal motor protection and pressure regulation ensure reliable and safe operation for professional users.

Technical Specifications

Input Power	1800 W
Rated Voltage	220-240V
Frequency	50/60Hz

Performance Metrics

Tank Capacity

50 L

Tank Volume

Air Displacement

188 L/min

Displacement

Max Pump Pressure

8 Bar

Max Pressure

115 psi

Max Pressure

Operational Details

Speed	2850 rpm
Noise Level	92 db

Features

Application Suitability

Workshop use • Power tool operation • Inflation

Key Features

Belt driving system, Oil-lubricated pump, Thermal motor protection, Pressure regulator, Pressure gauge, Wheels, Transport handle
