

Portable Air Compressor for Spraying and Spreading

This portable air compressor is designed for spraying machinery and spreading equipment. It features an aluminum tank for lightweight durability, dual pressure gauges for monitoring performance, and a compact design for easy transport and storage.

Product Overview

Professional Portable Air Compressor

This portable air compressor is engineered specifically for demanding spraying machinery and spreading equipment applications. Featuring a lightweight aluminum tank, it offers the perfect balance of portability and operational durability for job-site mobility. The unit is equipped with dual pressure gauges, ensuring precise performance monitoring for a wide range of pneumatic tasks.

Technical Specifications

Key Design Features

- Lightweight construction
- High portability
- Compact footprint
- Pneumatic optimization

Primary Applications

Spraying Machinery • Spreading Equipment • General Pneumatic Tasks

Tank Material	Aluminum
Monitoring	Dual Pressure Gauges
