

Portable Air Compressor with Pressure Gauges

This portable air compressor is designed for various applications. It features a durable construction with a green tank and a black motor housing.

Overview

Versatile Portable Air Compressor

This portable air compressor is engineered for reliability in both professional and DIY environments. Equipped with dual-gauge pressure monitoring and a high-efficiency 1.5 kW motor, it provides consistent performance for tasks ranging from inflating tires to powering pneumatic tools. Its compact, upright tank design and integrated carry handle ensure easy portability and space-saving storage.

Performance Metrics

Key Performance Indicators

1.5 kW

Power Output

115 Psi

Discharge Pressure

8.8 CFM

Max CFM

Technical Specifications

Model Specifications

Attribute	Value
Model Code	ZB-0.1/8 (SGQF9302)
Power (HP)	2
Cylinder Size	48mm
Rated Speed	2850/3450 r/min
Displacement	206/248 L/min
Tank Capacity	15 Liters (4 Usgal)
Noise Level	89 dB(A)

Physical Attributes

Dimensions & Weight

- Net weight: 22 kg
- Outer size (LxWxH): 41 x 40 x 72 cm

Features

Key Features

Portable Design, Dual Pressure Gauges, Safety Valve, Integrated Handle
