Product Overview

High-Efficiency Portable Air Compressor

This portable air compressor with a built-in tank is designed for versatility, simple maintenance, and a long service life. It features advanced technology that reduces vibration and noise levels significantly compared to traditional models. Engineered for energy efficiency, this unit consumes 50% less electricity than standard oil-free compressors while providing rapid air generation for demanding professional tasks.

Applications & Use Cases

Suitable Applications

Interior Decoration, Spray Painting, Factory Gas-Works, Food Production, Medical Facilities, Scientific Research

Performance & Features

Performance Highlights

50 %

Energy Savings

Operational Benefits

- Low noise operation
- Reduced vibration
- Rapid air generation
- Simple maintenance requirements
- Extended service life

Design & Portability

Portability Features

Portable Tank Design • Integrated Wheels • Transport Handle • Rubber Stability Feet

Key Components

- Twin-cylinder pump
- Pressure regulator
- Dual pressure gauges
- Moisture filter
- Pressure relief safety valve
