

Portable Air Compressor with Wheels

This portable air compressor is designed for a variety of pneumatic applications. It features durable construction with a painted air tank and a protective frame with wheels for easy maneuverability.

Overview

Professional Portable Air Compressor

The VFL-24F is a robust and highly portable air compressor engineered for versatile pneumatic applications. Featuring a durable blue air tank and a protective steel frame, it is built to withstand demanding work environments. Equipped with smooth-rolling red wheels and an integrated handle, this unit offers exceptional maneuverability, making it ideal for powering air tools and handling inflation tasks on the go.
