

Portable Air Conditioner Mosquito Net Tent

This innovative product combines a portable air conditioner with a mosquito net tent, providing a cool and insect-free environment. The air conditioner boasts strong and rapid cooling with efficient power consumption.

Overview

All-in-One Portable Cooling Solution

This innovative system combines a high-performance portable air conditioner with a protective mosquito net tent to create a cool, insect-free environment instantly. Designed for versatility, it requires no ice and offers rapid cooling with exceptional energy efficiency. Whether for indoor dormitories or outdoor field use, this lightweight unit can be fully assembled in just five minutes.

Key Features

Performance Highlights

13 kg

Unit Weight

5 min

Assembly Time

Core Benefits

- Strong and rapid cooling performance
- High volume airflow with low power consumption
- No ice required for operation
- Integrated mosquito protection

Technical Specifications

Net Weight	13 kg
Cooling Method	Refrigerant-based (No ice required)
