

Portable Air Conditioner with Adjustable Louvers

This portable air conditioner is designed for spot cooling in homes, offices, or other small spaces. It features adjustable louvers to direct airflow, a digital control panel for easy operation, and a washable filter for convenient maintenance.

Overview

Compact Cooling Solution

This portable air conditioner offers a versatile cooling solution for homes, offices, and small spaces. Designed for convenience, the unit features a self-evaporative system that minimizes maintenance and requires no permanent installation. With its slimline, compact design and integrated caster wheels, it provides highly portable climate control wherever it is needed most.
