

Portable Air Conditioner with Dehumidifier and Fan

This portable air conditioner delivers between 12,000 and 14,000 BTU. It offers dehumidifying and fan functions, with an optional heater function available.

Overview

Advanced Climate Control Solution

This high-performance portable air conditioner offers versatile 12,000 to 14,000 BTU cooling capacity, designed to handle small to medium-sized spaces with ease. Featuring a modern, compact aesthetic, the unit integrates cooling, dehumidifying, and fan functions, with an optional heater for year-round comfort. Its dual-hose technology ensures rapid, energy-efficient operation, while the patented self-evaporating system eliminates the need for manual water drainage.

Performance

Cooling Capacity

14000 BTU

Max Cooling Capacity

12000 BTU

Min Cooling Capacity

Refrigerant

R-410A

Features

Key Technologies

- Dual hose technology for rapid cooling
- Patented self-evaporating system
- No-bucket design
- Energy-efficient operation

Operational Modes

Cooling, Dehumidifying, Fan, Heating (Optional)
