

Portable Air Conditioner with Dehumidifying

This is a small mobile air conditioning unit with 7-8K BTU. It integrates air conditioning, dehumidifying, air supply, and optional heating functions, featuring electronic operation with remote control and a 24-hour timer.

Product Overview

Compact Comfort Solution

This portable air conditioner offers a versatile solution for indoor climate control, combining cooling, dehumidifying, and air supply functions in one compact unit. Designed for efficiency, it utilizes environmentally friendly R-410A refrigerant and features a patented non-drip system that eliminates the need for manual condensate drainage. With user-friendly electronic controls, a remote, and a 24-hour timer, it is an ideal choice for localized cooling in homes or offices.

Performance Specifications

Cooling Capacity

8000 BTU

Max Cooling

Refrigerant

R-410A

Features & Controls

Control Features

- Electronic operation
- Remote control included
- 24-hour programmable timer

Operating Modes

Cooling, Dehumidifying, Air Supply, Heating (Optional)

Design & Maintenance

Water Management

Patented NWT non-drip technology (no manual drainage required)
